Interim Consolidated

Financial Statements

First Quarter
March 31, 2018

CANADA'S PREMIER NON-BANK LENDER™

INTERIM CONSOLIDATED STATEMENTS OF FINANCIAL POSITION (UNAUDITED)

(in thousands of Canadian dollars)

	Notes	March 31 2018	December 31 2017
Assets			
Mortgages receivable	5	$ 647,849	$ 626,756
Foreclosed properties	6	1,066	1,064
Prepaid expenses		105	39
		$ 649,020	$ 627,859
Liabilities			
Borrowings under credit facility	7	$ 138,585	$ 144,454
Accounts payable and accrued liabilities	8	1,537	1,960
Accrued convertible debenture interest		2,862	2,636
Dividends payable		2,682	3,769
Convertible debentures	9	126,270	125,976
		271,936	278,795
Shareholders' equity			
Share capital		375,167	345,325
Deferred share incentive plan units		730	802
Equity component of convertible debentures		1,322	1,322
Contributed surplus		645	645
Retained earnings (deficit)		(780)	970
		377,084	349,064
		$ 649,020	$ 627,859
Commitments	*7, 13(d)*		

The accompanying notes are an integral part of these interim consolidated financial statements.

Approved on behalf of the board of directors:

"Robert Goodall" — Robert Goodall, Director

"Mark Silver" — Mark Silver, Director

INTERIM CONSOLIDATED STATEMENTS OF CHANGES IN SHAREHOLDERS' EQUITY (UNAUDITED)

(in thousands of Canadian dollars, except for number of common shares)

The accompanying notes are an integral part of these interim consolidated financial statements.

NOTE 1 – NATURE OF OPERATIONS

Atrium Mortgage Investment Corporation is a corporation domiciled in Canada, incorporated under the Ontario *Business Corporations Act*. The address of the company's registered head office and principal place of business is Suite 900, 20 Adelaide Street East, Toronto, Ontario M5C 2T6.

The company is a Mortgage Investment Corporation (MIC) as defined in Section 130.1(6) of the Canada *Income Tax Act* (ITA). Accordingly, the company is not taxed on income provided that its taxable income is paid to its shareholders in the form of dividends within 90 days after December 31 each year. Such dividends are generally treated by shareholders as interest income, so that each shareholder is in the same position as if the mortgage investments made by the company had been made directly by the shareholder.

The company's common shares are listed on the Toronto Stock Exchange (TSX) under the symbol AI and its convertible debentures are listed under the symbols AI.DB, AI.DB.A, AI.DB.B and AI.DB.C.

NOTE 2 – BASIS OF PRESENTATION

(a) Statement of compliance

These interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and follow International Accounting Standard 34 *Interim Financial Reporting* (IAS 34) as issued by the International Accounting Standards Board (IASB) as set out in Part I of the *CPA Canada Handbook – Accounting*. These interim consolidated financial statements should be read in conjunction with the company's audited financial statements for the year ended December 31, 2017. Except as indicated in Note 2(b), significant accounting policies have been consistently applied in the preparation of these interim consolidated financial statements. These statements were authorized for issuance by the board of directors on April 25, 2018.

(b) Change in accounting policy

Effective January 1, 2018, the company adopted IFRS 9 *Financial Instruments* (IFRS 9), which replaced IAS 39 *Financial Instruments: Recognition and Measurement*. IFRS 9 addresses classification and measurement of financial assets and liabilities, as well as impairment of financial assets. As a result of the application of IFRS 9, the company changed its accounting policies for financial assets and mortgages receivable effective January 1, 2018. As permitted by the transition provisions of IFRS 9, prior periods have not been restated. The company's financial assets continue to be measured at amortized cost, therefore, no reclassifications were required. Measurement differences in the carrying amounts on January 1, 2018 have been recognized through an adjustment to retained earnings on that date. See Notes 3(b), 3(d) and 5(b).

Financial liabilities continue to be recognized initially at fair value net of transaction costs, and are subsequently measured at amortized cost (see Note 3(g)).

(c) Basis of measurement

These interim consolidated financial statements are prepared on the historical cost basis.

(d) Functional and presentation currency

These interim consolidated financial statements are presented in Canadian dollars, which is also the company's functional currency. Dollars are expressed in thousands except for per share amounts or where the context requires otherwise.

(e) Principles of consolidation

These interim consolidated financial statements include the accounts of the company and CMCC Sisyphus LP, which is considered to be a subsidiary for accounting purposes. Consolidation commenced the date the company obtained control and continues until control ceases. Atrium has consolidated the subsidiary from August 5, 2016, the date of its formation. All transactions and balances between the company and the subsidiary have been eliminated, including unrealized gains and losses, if any.

NOTE 2 – BASIS OF PRESENTATION (continued)

(f) Use of estimates and judgements

The preparation of interim consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions and judgements that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the reporting date and the reported amounts of revenue and expenses during the reporting period. The most subjective of these estimates relates to: (a) valuation of mortgages receivable, which is affected primarily by the provision for mortgage losses, and (b) the measurement of the liability and equity components of the convertible debentures which depend upon the estimated market interest rates for a comparable debenture without the convertibility feature. Management believes that its estimates are appropriate; however, actual results could differ from the amounts estimated. Estimates and underlying assumptions are reviewed each quarter. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

NOTE 3 – SIGNIFICANT ACCOUNTING POLICIES

(a) Revenue recognition

Mortgage interest and fees revenues are recognized in the statement of income and comprehensive income using the effective interest method. Mortgage interest and fees revenues include the company's share of any fees received, as well as the effect of any discount or premium on the mortgage. Interest revenue is calculated on the gross carrying amount for mortgages receivable in Stage 1 and 2 and on the net carrying amount for mortgages receivable in Stage 3.

The effective interest method derives the interest rate that discounts the estimated future cash receipts during the expected life of the mortgage receivable (or, where appropriate, a shorter period) to its carrying amount. When calculating the effective interest rate, future cash flows are estimated considering all contractual terms of the financial instrument, but not future credit losses (see Note 3 (d)). The calculation of the effective interest rate includes all fees and transaction costs paid or received. Fees and transaction costs include incremental revenues and costs that are directly attributable to the acquisition or issuance of the mortgage.

(b) Financial assets – classification, initial recognition and measurement

The company's business model and a financial instrument's contractual cash flows determine its classification and measurement in the financial statements. Upon initial recognition, each financial asset will be classified as either fair value through profit or loss (FVTPL), amortized cost, or fair value through other comprehensive income (FVOCI). All equity instruments are measured at fair value. A debt instrument is recorded at amortized cost only if the entity is holding the instrument to collect contractual cash flows and the cash flows represent solely principal and interest. Otherwise it is recorded at FVTPL.

All financial assets are reviewed for impairment quarterly, and written down when there is evidence of impairment. A financial asset is considered to be impaired when there is objective evidence that one or more events have occurred that have a negative effect on the estimated future cash flows of the financial asset (see Note 3(d)).

(c) Financial instruments – derecognition of financial assets and liabilities

Financial assets are derecognized when the contractual rights to receive cash flows from the asset expire. When the company exercises its security and takes title to the underlying real estate, a mortgage receivable is derecognized on the date of foreclosure. Financial liabilities are derecognized when the obligation under the liability is discharged, cancelled, or expires.

NOTE 3 – SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) Mortgages receivable and provision for mortgage losses

Mortgages receivable are a financial asset and are recognized initially at fair value and are subsequently carried at amortized cost using the effective interest method. The company's business model is to hold mortgages receivable to collect contractual cash flows that represent solely payments of principal and interest. Mortgages receivable are assessed for impairment at the end of each reporting period in accordance with IFRS 9 as outlined below and are presented net of provisions for mortgage losses on the interim consolidated statement of financial position.

IFRS 9 uses an expected credit loss (ECL) model to determine impairment. The impairment requirements in IFRS 9 apply to financial assets that are measured at amortized cost or FVOCI, and off-balance-sheet lending commitments such as loan commitments and letters of credit (which are collectively referred to in this note as financial assets). The ECL model is forward looking and results in a provision for mortgage losses being recorded on all financial assets regardless of whether there has been a loss event. ECLs are the difference between the present value of all contractual cash flows that are due under the original terms of the contract and the present value of all cash flows expected to be received.

The ECL model uses a three-stage impairment approach based on changes in the credit risk of the financial asset since initial recognition. The three stages are as follows: Stage 1 – financial assets that have not experienced a significant increase in credit risk since initial recognition, Stage 2 – financial assets that have experienced a significant increase in credit risk between initial recognition and the reporting date, and Stage 3 – financial assets for which there is objective evidence of impairment at the reporting date. The company considers a number of factors when assessing if there has been a significant increase in credit risk, including the number of days past due, changes in the financial condition of the borrower, responsiveness of the borrower and other borrower or property specific information that may be available. The company also considers past events, current market conditions and supportable forward-looking information, including macro-economic factors. Interest revenue is calculated on the gross carrying amount for financial assets in Stage 1 and 2 and on the net carrying amount for financial assets in Stage 3.

The ECL model requires the recognition of credit losses equal to 12-month ECLs for Stage 1 financial assets and ECLs for the remaining life of the financial assets (lifetime expected credit losses) for financial assets classified as Stage 2 and 3. The lifetime expected credit losses represent the expected loss in value due to possible default events over the life of a financial instrument weighted by the likelihood of a loss. Three factors are primarily used to measure ECLs: probability of default (PD), loss given default (LGD) and exposure at default (EAD). These factors are used to estimate the ECLs for mortgages receivable classified as Stage 1. When mortgages receivable are considered to have experienced a significant increase in credit risk (Stage 2) or are considered to be impaired (Stage 3), each loan is assessed and the ECL estimated individually for each mortgage. The company considers a loan to be in default if it is greater than 30 days past due (90 days for single-family residential mortgages).

(e) Foreclosed properties

Foreclosed properties are properties over which the company has taken title through exercise of its security interest. Such properties are accounted for under the cost model of IAS 40, Investment Property. A foreclosed property is initially recognized at cost on the date of foreclosure, which is the book value of the respective mortgage net of any related provision for mortgage loss. Any costs subsequently incurred to complete the construction or development of a foreclosed property are capitalized. Depreciation is recorded from the date the property is substantially complete. If the higher of the fair value and the value in use of a foreclosed property (its recoverable amount) is less than its carrying amount, then an impairment loss is recognized for the excess. Any impairment loss, or gain or loss realized on disposal is recognized in the statement of income and comprehensive income.

NOTE 3 – SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Convertible debentures

Convertible debentures can be converted into common shares of the company at the option of the investor. They are compound financial instruments with two components: a financial liability, and a call option which is an equity instrument. The fair value of the liability component is measured as of the date that the debentures were issued, and the equity instrument is valued on that date based upon the difference between the fair value of the convertible debenture and the fair value of the liability component. The measurement of the fair value of the liability component is based upon market rates of interest on similar debt instruments without the conversion feature. Expenses of issue are allocated between the two components on a pro-rata basis. The book value of the debt is accreted up to its face value over the life of the debentures using the effective interest method, which applies a constant interest rate over the life of each debenture. The value of the equity component is not remeasured subsequent to its initial measurement date.

(g) Other financial liabilities

Other financial liabilities are non-derivative liabilities recognized initially at fair value, net of transaction costs, and are subsequently stated at amortized cost using the effective interest method. The company has classified borrowings under credit facility, accounts payable and accrued liabilities, dividends payable and the liability component of convertible debentures as other financial liabilities.

(h) Income taxes

The company qualifies as a Mortgage Investment Corporation under the ITA, and as such is not taxed on income provided that its taxable income is distributed to its shareholders in the form of dividends within 90 days after December 31 each year. It is the company's policy to pay such dividends to remain non-taxable. Accordingly, no provision for current or deferred income taxes is required.

(i) Earnings per common share

Basic earnings per common share is calculated by dividing earnings during the period by the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated by adjusting the income and comprehensive income attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all dilutive items such as convertible debentures and deferred share incentive plans.

(j) Share-based payments

The company has an equity-settled share-based compensation plan for grants to eligible directors, officers, and senior management under its deferred share incentive plan. Grants are measured based upon the fair value of the awards granted, using the volume-weighted average trading share price for the five trading days prior to date of the grant.

NOTE 4 – RECENT ACCOUNTING PRONOUNCEMENTS

Various pronouncements have been issued by the IASB or IFRS Interpretations Committee (IFRIC) that will be effective for future accounting periods. The company closely monitors new accounting standards as well as amendments to existing standards and assesses what impact, if any, they will have on the consolidated financial statements.

NOTE 5 – MORTGAGES RECEIVABLE

(a) Mortgage portfolio

	March 31, 2018			December 31, 2017		
Mortgage category	**Number**	**Outstanding amount**	**% of Portfolio**	**Number**	**Outstanding amount**	**% of Portfolio**
Low-rise residential	38	$ 250,335	38.3%	36	$ 234,343	37.1%
House and apartment	114	100,953	15.4%	120	86,287	13.6%
Construction	8	69,788	10.6%	8	64,828	10.3%
Mid-rise residential	3	37,000	5.6%	4	31,471	5.0%
High-rise residential	5	20,501	3.1%	7	44,949	7.1%
Condominium corporation	14	2,800	0.4%	14	2,887	0.4%
Residential portfolio	182	481,377	73.4%	189	464,765	73.5%
Commercial	26	174,196	26.6%	27	167,622	26.5%
Mortgage portfolio	208	655,573	100.0%	216	632,387	100.0%
Accrued interest receivable		2,653			2,537	
Mortgage discount		(252)			(262)	
Unamortized origination fees		(625)			(706)	
Provision for mortgage losses		(9,500)			(7,200)	
Mortgages receivable		$ 647,849			$ 626,756	

The expected credit loss model uses a three-stage impairment approach that is based on changes in the credit quality of the mortgage receivable since initial recognition. At March 31, 2018, the gross carrying amounts of the mortgage portfolio were classified as follows: Stage 1 - $629,391, Stage 2 - $6,615 and Stage 3 - $19,567.

The mortgage portfolio has maturity dates between 2018 and 2030 with a weighted average remaining term of 12.3 months at March 31, 2018 (December 31, 2017 – 12.4 months). The portfolio has a weighted average interest rate (which excludes lender fees earned by the company) of 8.50% as at March 31, 2018 (8.44% as at December 31, 2017, 8.46% as at March 31, 2017).

Within the mortgage portfolio, at March 31, 2018 there were 12 loans aggregating $40,717 (6.2% of the mortgage portfolio) in which the company has a subordinate position in a syndicated mortgage (December 31, 2017 – 13 mortgages aggregating $40,550, 6.4% of the portfolio). Additional analysis of the mortgage portfolio, including by location of underlying property and type of mortgage, is set out in the "Investment Portfolio" section of the Management's Discussion and Analysis for the quarter ended March 31, 2018.

Principal repayments based on contractual maturity dates are as follows:

Nine months ended December 31, 2018	$ 316,862	48.3%
Years ended December 31, 2019	214,651	32.7%
2020	93,797	14.3%
2021	23,295	3.6%
2022	320	0.1%
Thereafter	6,648	1.0%
	$ 655,573	100.0%

NOTE 5 – MORTGAGES RECEIVABLE (continued)

(b) Provision for mortgage losses

		IFRS 9 as at January 1, 2018 and March 31, 2018			
		Stage 1	Stage 2	Stage 3	Total
IAS 39 balance, December 31, 2017	$ 7,200				
Transition adjustment (Note 2(b))	2,000				
IFRS 9 opening balance, January 1, 2018	$ 9,200	$ 3,300	$ –	$ 5,900	$ 9,200
Provision for mortgage losses		200	–	100	300
Balance, March 31, 2018		$ 3,500	$ –	$ 6,000	$ 9,500

	Three months ended March 31 2017
Balance, beginning of period	$ 5,800
Mortgages settled during the period	(203)
Provision for mortgage losses	303
Balance, end of period	$ 5,900

The provision for mortgage losses for the period is the sum of the ECLs for all mortgages in the portfolio. Probability of default (PD), loss given default (LGD) and exposure at default (EAD) are used to estimate the ECLs from default events that are possible within the next 12 months for mortgages receivable classified as Stage 1. These variables are determined using historical data and current and future expected conditions are taken into consideration at each reporting period. When mortgages receivable are considered to have experienced a significant increase in credit risk (Stage 2) or are considered to be impaired (Stage 3), each loan is reviewed on an individual basis and the ECL estimated individually for each mortgage. Lifetime ECLs are estimated for mortgages with a significant increase in credit risk or that are considered to be impaired.

NOTE 6 – FORECLOSED PROPERTIES

In 2016, the company foreclosed on two properties which were the underlying security for mortgages receivable. The properties were recognized at cost of $1,179 on the dates of foreclosure. During the year ended December 31, 2017 the company disposed of one foreclosed property with a book value of $558 resulting in a net loss of $19. The book value at March 31, 2018 and December 31, 2017 approximates fair value.

	Three months ended March 31 2018	Year ended December 31 2017
Balance, beginning of period	$ 1,064	$ 1,223
Capital improvements	2	399
Disposition of foreclosed property	–	(558)
Balance, end of period	$ 1,066	$ 1,064

NOTE 7 – CREDIT FACILITY

At March 31, 2018, the company had a credit facility from a syndicate of four Canadian financial institutions of $210,000 (December 31, 2017 – $210,000) at a formula rate that varies with bank prime and the market bankers' acceptance rate. The annualized weighted average rate for the period ended March 31, 2018 was 3.53% (3.12% for the year ended December 31, 2017). Drawings under the credit facility may be by way of a bank loan (including an overdraft facility of up to $500), bankers' acceptances or letters of credit (LCs). LCs represent irrevocable assurances that the company's banks will make payments in the event that a customer cannot meet its obligations to third parties. LCs carry the same credit risk, recourse and collateral security requirements as mortgages extended to customers. The committed credit facility was effective November 28, 2017, has a term to January 11, 2020, and is subject to certain conditions of drawdown and other covenants.

NOTE 7 – CREDIT FACILITY (continued)

The credit facility is secured by a lien over all of the company's assets by means of a general security agreement. The amount that may be drawn down under the credit facility is determined by the aggregate value of mortgages that are acceptable to the lender. Under the terms of the credit facility, covenants must be met in respect of shareholders' equity, debt to total assets and interest coverage. At March 31, 2018 and December 31, 2017, the company was in compliance with these covenants.

Credit facility	March 31 2018	December 31 2017
Bankers' acceptances	$ 125,000	$ 125,000
Bank loan	14,200	19,900
Overdraft facility	95	254
Unamortized finance costs	(710)	(700)
Borrowings under credit facility	138,585	144,454
Letters of credit	3,523	3,640
Total credit facility utilization	$ 142,108	$ 148,094

NOTE 8 – RELATED PARTY TRANSACTIONS

The company pays management and mortgage servicing fees to Canadian Mortgage Capital Corporation (CMCC), which is the manager of the company, and responsible for its day-to-day management. The majority beneficial owner and Chief Executive Officer (CEO) of the manager is also CEO of the company. The company incurred management and mortgage servicing fees of $1,454 for the three months ended March 31, 2018 (three months ended March 31, 2017 – $1,292). The management agreement between the company and CMCC contains provisions for the payment of termination fees to the manager in the event that the management agreement is terminated in certain circumstances. Amounts due to related party of $511 (December 31, 2017 – $1,021) are included in accounts payable and accrued liabilities and are due to CMCC, are in the normal course of business, are non-interest bearing, due on demand and are paid within 30 days of each period end.

Certain of our mortgages are shared with other investors. As at March 31, 2018, companies owned by a director and officer of the company had co-invested in one syndicated mortgage. The total amount of the mortgage is $46,590 (December 31, 2017 – one syndicated mortgage of $45,360) of which the company's share is $23,295 (December 31, 2017 – $22,680).

As at March 31, 2018, the company had two mortgages receivable which a director and officer of the company has joint control over the borrowers of these mortgages. (December 31, 2017 – two).

- A mortgage loan with a total gross commitment of $3,490 (December 31, 2017 – $3,490), of which $3,148 (December 31, 2017 – $3,071) had been funded at March 31, 2018. During the three months ended March 31, 2018, the company recognized net mortgage interest and fees of $70 (three months ended March 31, 2017 – $nil) from this mortgage receivable.
- A mortgage loan with a total gross commitment of $8,738 (December 31, 2017 – $8,738). The company's share of the commitment is $2,330 (December 31, 2017 – $2,330), of which $2,330 had been funded at March 31, 2018 (December 31, 2017 – $2,330). During the three months ended March 31, 2018, the company recognized net mortgage interest and fees of $54 (three months ended March 31, 2017 – $nil) from this mortgage receivable.

Key management includes directors and officers of the company. Compensation expenses for key management personnel include:

	Three months ended March 31 2018	2017
Directors' fees	$ 45	$ 45
Share-based payments to directors (Note 11)	34	37
Share-based payments to officers (Note 11)	13	21
	$ 92	$ 103

Related party transactions are in the normal course of business and are recorded at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

NOTE 9 – CONVERTIBLE DEBENTURES

NOTE 10 – SHARE CAPITAL

The company is authorized to issue an unlimited number of common shares without par value. Common shares rank equally with each other and have no preference, conversion, exchange or redemption rights. Common shares participate pro rata with respect to any dividends paid, including distributions upon termination and dissolution. (See Note 15 – Subsequent events.)

The company has an optional dividend reinvestment plan (DRIP) for shareholders, whereby participants may reinvest cash dividends in additional common shares of the company at the volume weighted average price for five days prior to distribution, less a 2% discount. Shares issued under the DRIP are issued by the company from treasury.

Under the employee share purchase plan (ESPP), each participant may contribute up to an annual maximum to the ESPP, and CMCC (the manager) matches 50% of the participant's contribution. Thus, the company does not bear any of the cost of the ESPP, as it is reimbursed by CMCC and the participants.

NOTE 11 – SHARE-BASED PAYMENTS

	Three months ended March 31, 2018			Year ended December 31, 2017		
	Deferred share units	Income deferred share units	Total	Deferred share units	Income deferred share units	Total
Balance, beginning of period	81,667	11,502	93,169	68,917	8,448	77,365
Units granted	–	–	–	24,000	–	24,000
Units earned	–	1,360	1,360	–	5,948	5,948
Common shares issued	(11,000)	(2,131)	(13,131)	(11,250)	(2,894)	(14,144)
Balance, end of period	70,667	10,731	81,398	81,667	11,502	93,169

Share compensation expense:	Three months ended March 31 2018	2017
September 1, 2017 grant	$ 41	$ –
September 1, 2016 grant	24	50
September 1, 2015 grant	12	25
September 1, 2014 grant	4	11
August 30, 2013 grant	1	3
August 29, 2012 grant	–	1
	$ 82	$ 90

Grants are provided to directors and certain employees of the manager under the company's deferred share incentive plan ("DSIP"). The deferred share units vest annually over three years. Common shares are issued to participants on the vesting date of each tranche of deferred share units, unless a participant elects to defer the issuance. In addition, income deferred share units ("IDSU") are credited to holders of deferred share units granted before 2017 based upon dividends paid on common shares. The fair value of share-based compensation was based upon the volume weighted average market price of the common shares five days prior to the grant date of September 1, 2017 ($12.26).

NOTE 12 – EARNINGS PER SHARE

	Three months ended March 31 2018	2017
Basic earnings per share –		
Numerator		
Net income and comprehensive income for the period	$ 7,927	$ 7,158

Interest on convertible debentures	2,115	1,735
Net income and comprehensive income for diluted earnings per share	10,042	8,893
Denominator		
Weighted average common shares outstanding	33,411,042	28,741,679
Convertible debentures	9,236,711	7,543,271
Deferred share incentive plan	79,023	70,917
Income deferred share units	9,119	7,217
Weighted average common shares outstanding – diluted basis	42,735,895	36,363,084
Diluted earnings per share	$ 0.24	$ 0.24

NOTE 13 – FINANCIAL INSTRUMENTS

(a) Classification of financial instruments

Financial assets comprise mortgages receivable and are classified and measured at amortized cost. Financial liabilities comprise borrowings under credit facility, accounts payable and accrued liabilities, dividends payable and the liability component of convertible debentures. All financial liabilities are classified as other financial liabilities.

(b) Fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between arm's length market participants at the measurement date. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data or other means.
- Level 3 inputs are unobservable (supported by little or no market activity).

The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs. All financial assets are classified and measured at amortized cost. Their carrying values approximate their fair value due to their relatively short-term maturities and because market interest rates have not fluctuated significantly since the date at which the loans were entered into. The fair value of borrowings under credit facility approximates book value since it bears interest at floating rates. The accounts payable and accrued liabilities and dividends payable carrying value approximates their fair value due to the short term nature of the items.

The fair value of convertible debentures at the time of issue is established using Level 2 inputs. The fair value of convertible debentures has been determined based on the closing prices of the convertible debentures on the TSX on the respective dates.

Convertible debentures	March 31 2018	December 31 2017
Fair value	$ 131,097	$ 131,134
Less book value of equity component	(1,322)	(1,322)
	$ 129,775	$ 129,812
Book value of financial liability component	$ 126,270	$ 125,976

NOTE 13 – FINANCIAL INSTRUMENTS (continued)

(c) Credit risk

Mortgages receivable and issued letters of credit are exposed to credit risk. Credit risk is the risk that a counterparty to a financial instrument will fail to discharge its obligation or commitment, resulting in a financial loss to the company.

The company mitigates the credit risk by maintaining strict credit policies including due diligence processes, credit limits, documentation requirements, review and approval of new mortgages by the board of directors or a subgroup thereof, quarterly review of the entire portfolio by the board of directors, and other credit policies approved by the board of directors. Credit risk is approved by the board of directors. At March 31, 2018, the largest borrower group accounted for 10.4% of mortgages receivable (December 31, 2017 – 9.0%). See Note 5(a) for a breakdown of mortgages by category.

(d) Liquidity risk

Liquidity risk is the risk that the company will not be able to meet its obligations when due. The primary sources of liquidity risk are the requirements to fund commitments for new mortgages, advances on existing mortgages, as well as obligations under the company's credit facility. The company's liquidity risk is managed on an ongoing basis in accordance with the policies and procedures in place that reduce the risk to an acceptable level. Policies and procedures include continual monitoring of expected cash flows, reviewing credit requirements with the company's bankers, issuing convertible debentures or common shares in the public markets from time to time as required, and staggering the maturities of convertible debentures when they are issued. From time to time the company has arranged temporary increases in its credit facility with its banks in order to manage liquidity requirements, and expects to be able to continue to do so in the future if required. The company's significant financial liabilities include borrowings under credit facility, accounts payable and accrued liabilities, dividends payable and the liability component of convertible debentures. The borrowings under credit facility are drawn upon as required to discharge accounts payable and accrued liabilities as well as to pay out dividends on a monthly basis. The company's agreement with the lender is that the operating line will not be called provided that all covenants are met and that any significant excess cash is used to pay down the borrowings under credit facility.

March 31, 2018	Carrying value	Contractual cash flow	Within 1 year	1 to 3 years	3 to 5 years
Borrowings under credit facility[1]	$139,295	$148,428	$5,130	$143,298	$ –
Accounts payable and accrued liabilities	1,537	1,537	1,537	–	–
Dividends payable	2,682	2,682	2,682	–	–
Convertible debentures[2]	126,270	139,263	68,248	44,039	26,976
Total	269,784	291,910	77,597	187,337	26,976
Unadvanced mortgage commitments[3]	–	78,587	78,587	–	–
Total contractual liabilities	$269,784	$370,497	$156,184	$187,337	$ 26,976

Notes:

(1) Includes interest assuming the outstanding balance is not repaid until maturity on January 11, 2020.

(2) The 5.25% debentures are assumed to be repaid June 30, 2018; 6.25% debentures are assumed to be repaid April 1, 2018; 5.50% debentures are assumed to be repaid September 30, 2019 and 5.3% debentures are assumed to be repaid June 30, 2022.

(3) Unadvanced mortgage commitments include additional funds on existing mortgage and new mortgage commitments. The experience of the company has been that a portion of the unadvanced amounts on existing mortgages will never be drawn.

As at March 31, 2018, management considers that it has adequate procedures in place to manage liquidity risk.

NOTE 13 – FINANCIAL INSTRUMENTS (continued)

(e) Interest rate risk

The company is exposed to interest rate risk in that an increase in interest rates will result in increased interest expense due to its borrowings under credit facility being set at a variable rate but all mortgages being set at fixed rates. The financial structure of the company results in relatively moderate interest rate risk because a majority of the company's financing is through common shares and convertible debentures, with a moderate amount of borrowings under the credit facility that bear floating interest rates.

If interest rates on debt had been one percentage point higher (lower) during the period ended March 31, 2018, income and comprehensive income would have been reduced (increased) by approximately $1,415 during the period, assuming that no changes had been made to the interest rates at which new mortgage loans were entered into. However, if new mortgage loans had been entered into at higher (lower) interest rates, the resulting reduction of income and comprehensive income would have been less than (greater than) $1,415.

(f) Currency risk

Currency risk is the risk that the value of financial assets and liabilities will fluctuate due to changes in foreign exchange rates. The company is not exposed to currency risk as all assets and liabilities are denominated in Canadian funds.

NOTE 14 – CAPITAL MANAGEMENT

The company defines capital as total debt plus shareholders' equity, as shown below:

	March 31 2018	December 31 2017
Borrowings under credit facility	$ 138,585	$ 144,454
Convertible debentures	126,270	125,976
Total debt	264,855	270,430
Shareholders' equity	377,084	349,064
Capital employed	$ 641,939	$ 619,494

The company's objectives for managing capital are to preserve shareholders' equity, provide shareholders with stable dividends, and to use leverage in a conservative manner to improve return to shareholders. The company finances growth of its portfolio by issuing common shares and debt. In addition, a small amount of equity is raised every month through a dividend reinvestment plan for shareholders and the employee share purchase plan.

As bank borrowings increase, the company could expect to raise further funds through public offerings of convertible debentures or common shares, and through private placements of debt. The borrowings under credit facility are subject to external covenants as set out in Note 7. There has been no change in the company's capital management objectives since the prior period.

NOTE 15 – SUBSEQUENT EVENTS

On April 12, 2018, the company issued 25,222 common shares ($306) to shareholders under its dividend reinvestment plan.

On April 9, 2018, the company issued 360,000 common shares ($4,500) to shareholders under the over-allotment option of the public offering of common shares completed March 28, 2018. This issuance represented full exercise of the over-allotment option.
