About Atrium Mortgage Investment Corporation

Safety – Consistency – Yield

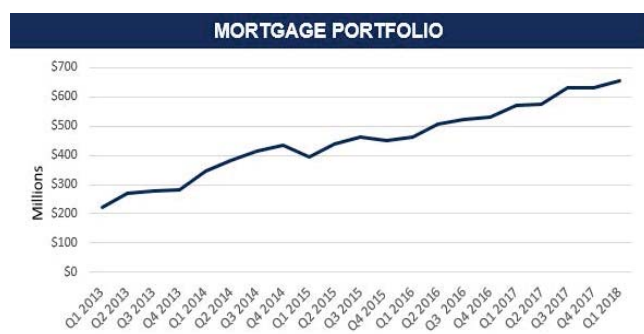

Atrium lends in major urban centres and where the stability and liquidity of real estate is high. As a mortgage lender, we fill the lending gap that results from the limited number of financial institutions operating in Canada. Our loan portfolio is high quality but we are able to charge higher rates than the banks because we offer flexibility, creativity and excellent service. Our mortgages are secured by all types of residential, multi-residential and commercial real property located in Canada, and must all be in strict compliance with our investment policies.

Atrium has an 18-year track record of success and consistency in achieving our strategic objectives: to grow in a controlled manner by focusing on real estate sectors with the lowest risk profiles.

Since commencing operations in 2001, our investment objectives have been to preserve our shareholders' equity and provide our shareholders with stable and secure dividends from our investments in mortgage loans within the criteria permitted for a Mortgage Investment Corporation (MIC). Working within conservative risk parameters, we endeavour to maximize income and dividends through careful underwriting and efficient management of our mortgage investments.

We were listed on the Toronto Stock Exchange in 2012; since then we have increased our regular dividends every year. Our regular dividend is paid monthly, currently at a rate of \$0.075 per share per month.

Year	Regular dividend	Bonus dividend	Total dividends paid	Earnings per share (basic)
2013	\$0.80	\$0.05	\$0.85	\$0.85
2014	\$0.82	\$0.07	\$0.89	\$0.91
2015	\$0.84	\$0.09	\$0.93	\$0.94
2016	\$0.86	\$0.10	\$0.96	\$0.97
2017	\$0.88	\$0.04	\$0.92	\$0.95
2018	\$0.90	to be determined		

FOR IMMEDIATE RELEASE

**ATRIUM MORTGAGE INVESTMENT CORPORATION
ACHIEVES RECORD EARNINGS
IN FIRST QUARTER OF 2018**

TORONTO: April 25, 2018 – Atrium Mortgage Investment Corporation (TSX: AI) today released its unaudited financial results for the three month period ended March 31, 2018.

Highlights for the quarter

- **Record earnings of \$7.9 million for the quarter, up 10.7% from prior year**
- **Revenues of \$13.4 million, up 11.8% from prior year**
- **\$0.24 basic and diluted earnings per share for the quarter**
- **Portfolio of \$656 million, up 3.7% from December 31, 2017**
- **High quality mortgage portfolio**
 - **81.6% of portfolio in first mortgages**
 - **86.2% of portfolio is less than 75% loan to value**
 - **average loan-to-value is 61.0%**

“We had a strong first quarter of 2018. Our mortgage portfolio grew to over \$655 million, and more importantly we continued to lend defensively by lowering Atrium’s average loan to value to 61.0 %. Our weighted average interest rate increased for the second consecutive quarter, climbing to 8.50%, up from 8.44% at December 31, 2017. On March 28, 2018 we closed a successful public offering of 2,400,000 common shares at \$12.50 per share for gross proceeds of \$30 million. Subsequent to quarter end, the underwriters fully exercised their over-allotment option of 360,000 common shares at \$12.50 per share for additional gross proceeds of \$4.5 million.” said Rob Goodall, CEO of Atrium.

Interested parties are invited to participate in a conference call with management on Thursday, April 26, 2018 at 4:00 p.m. ET to discuss the results. To participate or listen to the conference call live, please call 1 (888) 241-0551 or (647) 427-3415. For a replay of the conference call (available until May 9, 2018) please call 1 (855) 859-2056, Conference ID 4799748.

Results of operations

Atrium’s assets grew to \$649.0 million and revenues grew for the quarter to \$13.4 million, an increase of 11.8% from the prior year.

Net earnings for the three months ended March 31, 2018 were a record \$7.9 million, an increase of 10.7% from the prior year. Basic and diluted earnings per common share were \$0.24, for the three months ended March 31, 2018, compared with \$0.25 basic and \$0.24 diluted earnings per common share, respectively, for the comparable quarter in the prior year.

The company had \$647.8 million of mortgages receivable as at March 31, 2018, an increase of 3.4% from the December 31, 2017. During the quarter, \$70.8 million of mortgages were advanced, and \$48.9 million of mortgages were repaid.

The weighted average interest rate on the mortgage portfolio increased to 8.50% at March 31, 2018, compared with 8.44% at December 31, 2017 and 8.46% at March 31, 2017.

About Atrium

Canada's Premier Non-Bank Lender™

Atrium is a non-bank provider of residential and commercial mortgages that lends in major urban centres in Canada where the stability and liquidity of real estate are high. Atrium's objectives are to provide its shareholders with stable and secure dividends and preserve shareholders' equity by lending within conservative risk parameters. Atrium is a Mortgage Investment Corporation (MIC) as defined in the Canada *Income Tax Act*, so is not taxed on income provided that its taxable income is paid to its shareholders in the form of dividends within 90 days after December 31 each year. Such dividends are generally treated by shareholders as interest income, so that each shareholder is in the same position as if the mortgage investments made by the company had been made directly by the shareholder. For further information about Atrium, please refer to regulatory filings available at www.sedar.com or investor information on Atrium's website at www.atriummic.com.

Management's Discussion And Analysis

First Quarter
March 31, 2018

CANADA'S PREMIER NON-BANK LENDER™

Management's Discussion and Analysis

March 31, 2018

Our business

Atrium is a mortgage lender filling the lending gap that results from the limited number of financial institutions operating in Canada. We lend in major urban centres and where the stability and liquidity of real estate are high. Our loan portfolio is high quality but we are able to charge higher rates than the banks because we offer flexibility, creativity and excellent service. Our mortgages are secured by all types of residential, multi-residential and commercial real estate located in Canada, and must all be in strict compliance with our investment policies. Atrium has a 18-year track record of success and consistency in achieving our strategic objectives: to grow in a controlled manner by focusing on real estate sectors with the lowest risk profiles.

Our objective is to invest in a diverse portfolio of predominantly first mortgages that are relatively short-term, to provide our shareholders with stable and secure dividends while preserving shareholders' equity, all within the parameters mandated for a Mortgage Investment Corporation (MIC). Working within conservative risk parameters, we endeavour to maximize income and dividends through careful underwriting and efficient management of our mortgage investments.

Information herein is current as of April 25, 2018.

Highlights

Atrium continues to demonstrate strength and stability. For the quarter ended March 31, 2018, we had revenues of \$13.4 million, up 11.8% from the comparable period. Earnings were a record \$7.9 million, or \$0.24 basic per share, compared with \$7.2 million, or \$0.25 basic per share in the comparable period.

During the quarter we issued common shares for gross proceeds of \$30.0 million, with the full amount of the overallotment options being issued subsequent to quarter end on April 9, 2018.

We declared a regular dividend of \$0.075 per share for each month in the quarter, a total of \$0.225 for the year to date compared to \$0.220 for the comparative period

Since listing on the Toronto Stock Exchange in 2012, we have increased our regular dividends every year:

<i>Year</i>	<i>Regular dividend</i>	<i>Bonus dividend</i>	<i>Total dividends paid</i>	<i>Earnings per share (basic)</i>
2013	\$0.80	\$0.05	\$0.85	\$0.85
2014	\$0.82	\$0.07	\$0.89	\$0.91
2015	\$0.84	\$0.09	\$0.93	\$0.94
2016	\$0.86	\$0.10	\$0.96	\$0.97
2017	\$0.88	\$0.04	\$0.92	\$0.95
2018	\$0.90	to be determined		

We had \$647.8 million of mortgages receivable as at March 31, 2018, an increase of 3.4% from December 31, 2017. During the quarter, \$70.8 million of mortgages were advanced and \$48.9 million of mortgages were repaid. The portfolio has a weighted average remaining term of 12.3 months.

Our focus continues to be lending in the major metropolitan areas of Ontario and British Columbia.

Revenues \$13.4 million increased 11.8% from comparative quarter

Earnings per share \$0.24 basic for the quarter

Strong, high quality mortgage portfolio

82% first mortgages

86% less than 75% loan-to-value

Mortgages receivable \$647.8 million, up 3.4% since year-end

We focus on first mortgages with high liquidity and low loan-to-value ratios

Investment portfolio

Our mortgage portfolio consisted of 208 mortgage loans and aggregated \$655.6 million at March 31, 2018, an increase of 3.7% from December 31, 2017.

Mortgage category	March 31, 2018			December 31, 2017

A summary of our mortgages by size is presented below.

Mortgage amount	March 31, 2018			December 31, 2017		
	Number	Outstanding amount	% of Portfolio	Number	Outstanding amount	% of Portfolio
(outstanding amounts in 000s)						
\$0 - \$2,500,000	153	\$ 104,469	15.9%	161	\$ 105,386	16.7%
\$2,500,001 - \$5,000,000	17	61,584	9.4%	19	69,755	11.0%
\$5,000,001 - \$7,500,000	11	65,601	10.0%	10	60,555	9.6%
\$7,500,001 - \$10,000,000	5	45,224	6.9%	5	42,920	6.8%
\$10,000,001 +	22	378,695	57.8%	21	353,771	55.9%
	<u>208</u>	<u>\$ 655,573</u>	<u>100.0%</u>	<u>216</u>	<u>\$ 632,387</u>	<u>100.0%</u>

As of March 31, 2018, the average outstanding mortgage balance was \$3.2 million (December 31, 2017 – \$2.9 million), and the median outstanding mortgage balance was \$0.8 million (December 31, 2017 – \$0.8 million).

The tables below show our mortgage portfolio by location of the underlying property and type of mortgage. The weighted average interest rates shown exclude the lender fees paid by the borrower, which reflect the yield to Atrium including any mortgage discount or premium.

We are continuing to reduce our exposure in Alberta; 91.9% of the remaining Alberta loans are first mortgages. In that market our exposure is further mitigated by not lending to office, high-rise condominiums or to hotels.

Location of underlying property	March 31, 2018

Conventional mortgages are those with a loan-to-value of less than or equal to 75%, which is the industry standard for determining that a mortgage is conventional. Non-conventional mortgages are those with a loan-to-value in excess of 75%.

The weighted average term remaining for our mortgage portfolio at March 31, 2018 is 12.3 months (December 31, 2016 – 12.4 months).

Our business

In Canada there is a lending gap due to the limited number of financial institutions operating. Our business is to help fill that gap by focusing on loans that cannot be placed with larger financial institutions but represent an acceptable underwriting risk. Our borrowers benefit from our efficient, thorough and fast underwriting process. We lend in major urban centres where the stability and liquidity of real estate are at the highest levels.

Our policy is that the weighted average loan-to-value ratio of our mortgage portfolio, as a whole, at the time of underwriting each loan in our portfolio, will not exceed 75%. At March 31, 2018, the weighted average loan-to-value ratio of the mortgage portfolio was considerably lower than that, at 61.0%, compared to 61.5% at December 31, 2017.

A typical loan in our portfolio has an interest rate of 7.75% to 10% per annum, a one or two-year term and monthly interest-only mortgage payments.

Our lending parameters are as follows:

- Mortgages on residential and commercial properties up to a maximum of 75% of appraised value.
- Loans on single family residences up to 75% of appraised value.
- Mortgages on income-producing real estate up to a maximum of 85% of appraised value.
- Construction loans up to a maximum of 90% of cost.
- Loans to condominium corporations.

Mortgage loan amounts are generally \$300,000 to \$30 million. The largest single mortgage in our mortgage portfolio as at March 31, 2018 was \$33.3 million (December 31, 2017 – \$32.3 million). For loan amounts in excess of \$30 million, we generally co-lend with a financial institution or private lender.

Our investment policies, which may be changed by our board of directors, are as follows:

- We may invest only in residential mortgages, commercial mortgages, commercial mortgage backed securities and certain related investments.
- All investments must be mortgages on the security of real property situated within Canada, loans to condominium corporations, or certain permitted interim investments.
- Commercial mortgages may not constitute more than 50% of our total assets at any time.
- The term of the mortgage may generally be no greater than ten years.
- Mortgages are subject to the following geographic limits at the time of funding: Ontario – maximum 80% of total mortgages; Alberta – maximum 15% of total mortgages; British Columbia – maximum of 35% of total mortgages
- No single borrower may account for more than 15% of our total assets.
- All mortgages are supported by external appraisals by a qualified appraiser. All mortgages, except mortgages secured by one to six residential units, are also supported by environmental audits.
- The maximum initial loan-to-value ratio of an individual mortgage is 85% including any prior ranking encumbrances, and the weighted average loan-to-value ratio of our mortgage portfolio at the time of underwriting each loan may not exceed 75%.
- Our ratio of debt to equity must be less than 1:1.
- We do not invest directly in real property, although real property may be acquired by foreclosing on a mortgage.
- A mortgage investment of: (i) \$2,000,000 or more requires approval of the board; (ii) between \$1,000,000 and \$2,000,000 requires approval of three members of the board, including at least two independent directors; and (iii) \$1,000,000 or less requires approval of any one member of the board. For loans previously approved, the approval of one member of the board is required for changes to the loan that do not exceed the approved amount by more than \$200,000 and/or for minor technical amendments that do not change other underwriting considerations, provided the loan-to-value ratio increases by less than 5% and the ratio is 75% or less. We may invest in interim investments that are guaranteed by the Government of Canada or of a province or territory of Canada or deposits or certificates of deposits, acceptances and other similar instruments issued, endorsed or guaranteed by a Schedule I Bank in any amount without prior board approval.
- We may not make unsecured loans to, nor invest in securities issued by, our manager or its affiliates, nor make loans to the directors or officers of the manager.
- We may not make any investment, or incur any indebtedness, that would result in our not qualifying as a MIC.

Our objective is to invest in a diverse portfolio of predominantly first mortgages that are relatively short-term, to provide our shareholders with stable and secure dividends while preserving shareholders' equity, all within the parameters mandated for a MIC. Working within conservative risk parameters, we endeavour to maximize income and dividends through the sourcing and efficient management of our mortgage investments.

We are a non-bank lender and invest in mortgages secured by all types of residential, multi-residential and commercial real property located in Canada, subject to compliance with our investment policies. The types of properties that we finance include residential houses, small multi-family residential properties comprised of six or fewer units, residential apartment buildings, commercial properties and store-front retail properties, commercial properties, residential and commercial land development sites and construction projects. We also provide short-term bridge financing for real estate developers. Our strategy is to grow in a controlled manner by diversifying geographically, and focusing on real estate sectors with the lowest risk profiles.

We qualify as a MIC and are restricted from any activity that would result in us failing to qualify as a MIC. In order to qualify as a MIC, we must satisfy the requirements in subsection 130.1(6) of the *Income Tax Act* (Canada) ("ITA") throughout the taxation year. Among the requirements are:

- We can only invest or manage funds and cannot manage or develop real property.
- We cannot own debts secured on real property situated outside Canada, debts owing by non-residents unless such debts were secured on real property situated in Canada, shares of the capital stock of corporations not resident in Canada, or real property situated outside of Canada or any leasehold interest in such property.
- No shareholder (together with related persons, as defined in the ITA) may at any time own, directly or indirectly, more than 25% of our common shares.
- The cost for tax purposes of cash on hand, debts secured on specified residential properties, and funds on deposit with a Canada Deposit Insurance Fund or Régie de l'assurance-dépôts du Québec-insured institution or credit union must constitute at least 50% of the cost of all of our property.
- The cost for tax purposes of any interests in real property (including leaseholds but excepting real or immovable property acquired by foreclosure after default by the mortgagor) may not exceed 25% of the cost of all of our property.
- There are certain restrictions as to our maximum debt-to-equity ratio.

We are managed by Canadian Mortgage Capital Corporation (the "manager" or "CMCC"), which is our exclusive manager and arranges and services our mortgage loans and otherwise directs our affairs and manages our business. For explanations as to some of the terms used herein, please refer to our Annual Information Form for the year ended December 31, 2017, which is available at www.sedar.com.

Results of operations – three months ended March 31, 2018

For the three months ended March 31, 2018, mortgage interest and fees revenues aggregated \$13,374, compared to \$11,966 in the comparative period, an increase of 11.8%, as a result of the growth of our mortgage portfolio. The weighted average interest rate on our mortgage portfolio was 8.50% at March 31, 2018, compared with 8.44% at the previous year end, December 31, 2017 and 8.46% at March 31, 2017.

Operating expenses, excluding the provision for mortgage losses, for the three months ended March 31, 2018 were \$1,706, compared to \$1,577 in the comparative period, an increase of 8.2%, due to the growth of the mortgage portfolio. The provision for mortgage losses was \$300 in the quarter to bring the total reserve to \$9,500.

Mortgage servicing and other fees paid to the manager (that is, the management fee plus HST) aggregated \$1,454 for the three months ended March 31, 2018, compared with \$1,292 in the prior year period. This increase was due to the increase in the size of the mortgage portfolio. Financing costs for the three months ended March 31, 2018 were \$3,441, compared to \$2,928 in the same period of 2017, an increase of 17.5%. This increase is due to the increased utilization of our bank line of credit compared to the comparable period, an increase in interest rates, as well as an increase in our operating line to \$210,000 in the fourth quarter of 2017.

Net income for the three months ended March 31, 2018 was \$7,927, an increase of 10.7% from net income of \$7,158 for the same period in the prior year. Basic and diluted earnings per common share were \$0.24, for the three months ended March 31, 2018, compared with \$0.25 basic and \$0.24 diluted, for the comparable period in the previous year. Earnings per share has decreased slightly from the comparative periods due to the two public offering issuances of shares completed in 2017 and a public offering of shares in the first quarter of 2018.

During the three months ended March 31, 2018, we funded mortgages aggregating \$75,950. Of those advances, \$64,662 were first mortgages, representing 85.1% of the total loans funded. British Columbia advances were \$39,623, advances of \$93 were on properties in Alberta, \$757 were non-GTA Ontario, \$1,059 were on properties in Saskatchewan and the remaining \$34,418 were for mortgages on properties located in the Greater Toronto Area. There were \$52,764 of repayments during the period. The total portfolio increased from \$632,387 to \$655,573 during the three-month period.

Liquidity and capital resources

At March 31, 2018, we had borrowings under credit facility (excluding unamortized finance costs) of \$139,295. The credit facility, currently authorized for up to \$210,000 (December 31, 2017 – \$210,000), is provided by a syndicate of four major chartered banks, drawn through a combination of bankers' acceptances and bank loans to minimize our borrowing costs. At any time during the term of the credit facility, we have the one-time right to increase the credit facility by up to \$30,000 (such that the total maximum availability would be up to \$240,000). We were in compliance with the covenants in the credit facility as at March 31, 2018, and we expect to remain in compliance with such covenants going forward.

We also have four series of convertible debentures outstanding, with a total book value of \$126,270 at March 31, 2018, and a face value (and maturity value) of \$129,816. (For additional information on the operating credit facility and the debentures, please refer to notes 7 and 9, respectively, of our accompanying interim consolidated financial statements.)

During the quarter we completed a bought deal public offering and issued 2,400,000 common shares for gross proceeds of \$30,000. The full amount of the overallotment option was exercised subsequent to quarter end, resulting in the issuance of an additional 360,000 common shares for gross proceeds of \$4,500.

The growth in our mortgage portfolio has been financed by the issuance of common shares, of convertible debt, and through the operating credit facility. We expect to be able to generate sufficient funds for future growth in net mortgage loan investments by utilizing those three sources of funds. As at March 31, 2018, total debt (consisting of borrowings under operating credit facility and convertible debentures) was 41.5% of total assets (December 31, 2017 – 43.7%). Our policy and our banking arrangements both require that total debt not exceed 50% of total assets.

Changes in financial position

During the quarter ended March 31, 2018, we completed one public offering, issuing a total of 2,400,000 common shares for gross proceeds of \$30,000. Cash used in financing activities included net repayment of the operating facility of \$5,859, dividends paid of \$7,668 and interest paid of \$2,932, resulting in net cash provided by financing activities of \$12,276.

Cash used in investing activities during the quarter ended March 31, 2018 consisted primarily of advances on mortgage loan investments of \$70,779, less repayments received of \$48,929, for net cash invested in mortgage loan investments of \$21,850. This net cash outflow was increased by net cash outflows of \$2 from sundry activities. Thus, the use of cash for investing activities was primarily to support growth in our mortgage portfolio.

Borrowings under our operating credit facility decreased to \$139,295 at March 31, 2018, from \$145,154 at December 31, 2017, as a result of the issuances of shares completed during the period, as described above, net of the effect of the increase in our mortgage portfolio.

Accounts payable and accrued liabilities were \$4,399 at March 31, 2018 compared to \$4,596 at December 31, 2017. This decrease is due to timing differences of payments at year end. Dividends payable were \$2,682 at March 31, 2018 down from \$3,769 at December 31, 2017. The decrease was primarily due to the accrual of the special dividend at December 31, 2017.

Share capital increased to \$375,167 at March 31, 2018 from \$345,325 at December 31, 2017 due to issuances of our common shares completed during the first quarter.

Contractual obligations

Contractual obligations due at March 31, 2018 were as follows:

March 31, 2018	Total obligation	Within 1 year	1 to 3 years	3 to 5 years	More than 5 years
Borrowings under credit facility	139,295	–	139,295	–	–
Accounts payable and accrued liabilities	1,537	1,537	–	–	–
Accrued convertible debenture interest	2,862	2,862	–	–	–
Dividends payable	2,682	2,682	–	–	–
Convertible debentures	129,816	31,766	32,500	40,250	25,300
Total contractual obligations	276,192	38,847	171,795	40,250	25,300

We have commitments to advance additional funds under existing mortgages of \$64,887 and for new mortgages of \$13,700 at March 31, 2018 (December 31, 2016 – \$65,005 and \$9,489 respectively). Generally, outstanding commitments are expected to be funded within the next 24 months. However, our experience has been that a portion of the unfunded amounts on existing mortgages will never be drawn.

Off-balance sheet arrangements

As at March 31, 2018, we had \$3,523 (December 31, 2017 – \$3,640) of letters of credit (LCs) outstanding which were issued under our operating credit facility. The maximum available by way of LCs under our operating credit facility is \$10,000. LCs represent irrevocable assurances that our banks will make payments in the event that a customer cannot meet its obligations to third parties. LCs carry the same credit risk, recourse and collateral security requirements as mortgages extended to customers.

Transactions with related parties

Transactions with related parties are in the normal course of business and are recorded at the exchange amount, which is the amount of consideration established and agreed to by the related parties, and are measured at fair value.

The manager is responsible for our day-to-day activities. We incurred management and mortgage servicing fees from a subsidiary of the manager of \$1,454 for the quarter ended March 31, 2018 (quarter ended March 31, 2017 – \$1,292). Mr. Robert G. Goodall is a director and part of the key management personnel of the manager, received compensation from the manager, and is also a director of Atrium. The management agreement between us and the manager contains provisions for the payment of termination fees to the manager in the event that the management agreement is terminated in certain circumstances. The manager also acts as broker for our mortgages. The manager receives origination fees from the borrowers of up to 1% of the amount being funded; origination fees in excess of 1% are split equally between the manager and Atrium.

Certain of our mortgages are shared with other investors. As at March 31, 2018, companies owned by a director and officer of the company had co-invested in one syndicated mortgage. The total amount of the mortgage is \$46,590 (December 31, 2017 – one syndicated mortgage of \$45,360) of which the company's share is \$23,295 (December 31, 2017 – \$22,680).

As at March 31, 2018, the company had two mortgages receivable which a director and officer of the company has joint control over the borrowers of these mortgages. (December 31, 2017 – two).

- A mortgage loan with a total gross commitment of \$3,490 (December 31, 2017 – \$3,490), of which \$3,148 (December 31, 2017 – \$3,071) had been funded at March 31, 2018. During the three months ended March 31, 2018, the company recognized net mortgage interest and fees of \$70 (three months ended March 31, 2017 – \$nil) from this mortgage receivable.
- A mortgage loan with a total gross commitment of \$8,738 (December 31, 2017 – \$8,738). The company's share of the commitment is \$2,330 (December 31, 2017 – \$2,330), of which \$2,330 had been funded at March 31, 2018 (December 31, 2017 – \$2,330). During the three months ended March 31, 2018, the company recognized net mortgage interest and fees of \$54 (three months ended March 31, 2017 – \$nil) from this mortgage receivable.

Critical accounting estimates and policies

Our interim consolidated annual financial statements for the quarter ended March 31, 2018 are prepared in accordance with Canadian generally accepted accounting principles and IFRS, as set out in Part I of the CPA Canada *Handbook*. Management makes certain estimates and relies upon certain assumptions related to reporting our assets and liabilities as well as results of operations in conformity with Canadian generally accepted accounting principles. Actual results will differ from these estimates and assumptions.

The preparation of consolidated financial statements in accordance with IFRS requires us to make estimates and assumptions and to apply judgement. The most subjective of these are the valuation of mortgages receivable including the provision for mortgage losses, as well as the measurement of the liability and equity components of our convertible debentures. We believe that our estimates are appropriate; however, actual results could differ from the amounts estimated. Estimates and underlying assumptions are reviewed each quarter. The more significant accounting policies are set out below.

Revenue recognition

Mortgage interest and fees revenues are recognized in the statement of income and comprehensive income using the effective interest method. Mortgage interest and fees revenues include the company's share of any fees received, as well as the effect of any discount or premium on the mortgage. Interest revenue is calculated on the gross carrying amount for mortgages receivable in Stage 1 and 2 and on the net carrying amount for mortgages receivable in Stage 3.

The effective interest method derives the interest rate that discounts the estimated future cash receipts during the expected life of the mortgage receivable (or, where appropriate, a shorter period) to its carrying amount. When calculating the effective interest rate, future cash flows are estimated considering all contractual terms of the financial instrument, but not future credit losses. The calculation of the effective interest rate includes all fees and transaction costs paid or received. Fees and transaction costs include incremental revenues and costs that are directly attributable to the acquisition or issuance of the mortgage.

Mortgages receivable

Mortgages receivable are a financial asset and are recognized initially at fair value and are subsequently carried at amortized cost using the effective interest method. The company's business model is to hold mortgages receivable to collect contractual cash flows that represent solely payments of principal and interest. Mortgages receivable are assessed for impairment at the end of each reporting period in accordance with IFRS 9 as outlined below and are presented net of provisions for mortgage losses on the interim consolidated statement of financial position.

IFRS 9 uses an expected credit loss (ECL) model to determine impairment. The impairment requirements in IFRS

9 apply to financial assets that are measured at amortized cost or FVOCI, and off-balance-sheet lending commitments such as loan commitments and letters of credit (which are collectively referred to in this note as financial assets). The ECL model is forward looking and results in a provision for mortgage losses being recorded on all financial assets regardless of whether there has been a loss event. ECLs are the difference between the present value of all contractual cash flows that are due under the original terms of the contract and the present value of all cash flows expected to be received.

The ECL model uses a three-stage impairment approach based on changes in the credit risk of the financial asset since initial recognition. The three stages are as follows: Stage 1 – financial assets that have not experienced a significant increase in credit risk since initial recognition, Stage 2 – financial assets that have experienced a significant increase in credit risk between initial recognition and the reporting date, and Stage 3 – financial assets for which there is objective evidence of impairment at the reporting date. The ECL model requires the recognition of credit losses equal to 12-month ECLs for Stage 1 financial assets and ECLs for the remaining life of the financial assets (lifetime expected credit losses) for financial assets classified as Stage 2 and 3. The lifetime expected credit losses represent the expected loss in value due to possible default events over the life of a financial instrument weighted by the likelihood of a loss. The company considers a loan to be in default if it is greater than 30 days past due (90 days for single-family residential mortgages).

To identify whether the credit risk of a financial asset has significantly increased since initial recognition, management considers a number of factors, including past events, current market conditions and supportable forward-looking information, including macro-economic factors as well as information related to the specific borrower. Interest revenue is calculated on the gross carrying amount for financial assets in Stage 1 and 2 and on the net carrying amount for financial assets in Stage 3.

Three factors are primarily used to measure ECLs: probability of default (PD), loss given default (LGD) and exposure at default (EAD). These factors are used to estimate the ECLs for mortgages receivable classified as Stage 1. When mortgages receivable are considered to have experienced a significant increase in credit risk (Stage 2) or are considered to be impaired (Stage 3), each loan is assessed and the ECL estimated individually for each mortgage.

Convertible debentures

The convertible debentures can be converted into our common shares at the option of the investor. They are compound financial instruments with two components: a financial liability, and a call option which is an equity instrument. The fair value of the liability component is measured as of the date that the debentures were issued, and the equity instrument is valued on that date based upon the difference between the fair value of the debenture and the fair value of the liability component.

The measurement of the fair value of the liability component is based upon market rates of interest on similar debt instruments without the conversion feature. Expenses of issue are allocated between the two components on a *pro-rata* basis. The book value of the debt is accreted up to its face value over the life of the debentures using the effective interest method, which provides for the application of a constant interest rate over the life of the debenture. The value of the equity component is not re-measured subsequent to its initial measurement date.

Income taxes

We are, and intend to maintain our status as, a MIC, and as such are not taxed on income provided that it flows through to our shareholders as dividends during the year or within 90 days after December 31 each year. It is our policy to pay such dividends to our shareholders to remain non-taxable. Accordingly, no provision for current or future income taxes is required.

Future changes in accounting policies

Various pronouncements have been issued by the IASB or IFRS Interpretations Committee (IFRIC) that will be effective for future accounting periods. The company closely monitors new accounting standards as well as amendments to existing standards and assesses what impact, if any, they will have on the consolidated financial statements.

Controls and procedures

Our Chief Executive Officer (CEO) and Chief Financial Officer (CFO) are responsible for establishing and maintaining disclosure controls and procedures (DC&P) and internal control over financial reporting (ICFR), as those terms are defined in National Instrument (NI) 52-109 – *Certification of Disclosure in Issuers' Annual and Interim Filings*.

We designed the DC&P and ICFR, the latter of which was using the framework in *Internal Control – Integrated Framework* (published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and as revised in 2013) to provide reasonable assurance that material information relating to us is made known to our CEO

and CFO during the reporting period; and information required to be disclosed by us in our filings under securities legislation is recorded, processed, summarized and reported within the required time periods; and provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with Canadian generally accepted accounting principles (GAAP).

Our CEO and CFO evaluated the design effectiveness of the DC&P and ICFR, as defined by NI 52-109, as of March 31, 2018. Based on this evaluation, they concluded that the designs of the DC&P and ICFR were effective as of that date. NI 52-109 also requires Canadian public companies to disclose in their MD&A any change in ICFR during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, ICFR. No such change to ICFR has occurred during the most recently completed quarter.

It should be noted that a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that its objectives are met. Because of the inherent limitations in any control system, no evaluation of control can provide absolute assurance that all control weaknesses including, for example, any instances of fraud, have been detected. Inherent limitations include: (i) that management's assumptions and judgements could ultimately prove to be incorrect as conditions and circumstances vary; (ii) the impact of any undetected errors; and (iii) controls may be circumvented through the unauthorized acts of individuals, by collusion of two or more people, or by management override. The design of any system of control is also based upon assumptions as to the likelihood of future events and there is no assurance that any design will succeed in achieving its goals under future conditions.

Outstanding share data

Our authorized capital consists of an unlimited number of common shares, of which 35,757,773 were issued and outstanding at March 31, 2018, and 36,142,995 were issued and outstanding as at the date hereof. In addition, as at the date hereof, 2,407,408, 2,388,422, 2,747,440 and 1,693,440 common shares are issuable upon conversion or redemption or in respect of repayment at maturity of the outstanding 5.25%, 6.25%, 5.50% and the 5.30% convertible debentures, using the conversion price of \$13.50, \$13.30, \$14.65, and \$14.94 respectively, for each common share.

We also have an employee share purchase plan, a deferred share incentive plan and a dividend reinvestment plan pursuant to which common shares are issued from time to time.

Subsequent to March 31, 2018, we issued 360,000 common shares for gross proceeds of \$4,500 in connection with the over-allotment option of the share issuance completed on March 28, 2018. This issuance represents full exercise of the over-allotment option. The net proceeds have been used to repay bank indebtedness under our operating credit facility.

Risks and uncertainties

We are subject to many risks and uncertainties that may limit our ability to execute our strategies and achieve our objectives. We have processes and procedures in place in an attempt to control or mitigate certain risks, while others cannot be or are not mitigated. Material risks that cannot be mitigated include a significant decline in the general real estate market, interest rates changing markedly, being unable to make mortgage loans at rates consistent with rates historically achieved, not having adequate mortgage loan opportunities presented to us, and not having adequate sources of bank finance available.

Under various federal, provincial and municipal laws, an owner or operator of real property could become liable for the cost of removal or remediation of certain hazardous or toxic substances released on or in its properties or disposed of at other locations. In rare circumstances where a mortgage is in default, we may take possession of real property and may become liable for environmental issues as a mortgagee in possession. As part of the due diligence performed in respect of our mortgage loan investments, we obtain a Phase I environmental audit on the underlying real property provided as security for a mortgage, unless the manager has determined that a Phase I environmental audit is not necessary.

Please also refer to "Forward-looking information," below, and the "Risk Factors" section of our Annual Information Form for the year ended December 31, 2017 which is incorporated herein by reference and is available at www.sedar.com and at www.atriummic.com.

Forward-looking information

From time to time in our public communications we provide forward-looking statements. Such statements are disclosures regarding possible events, conditions, results of operations or changes in financial position that are based upon assumptions and expectations. These are not based upon historical facts but are with respect to management's beliefs, estimates, and intentions. Forward-looking statements generally can be identified by the use of forward-looking terminology such as "outlook", "objective", "may", "will", "expect", "intent", "estimate", "anticipate", "believe", "should", "plans" or "continue" or similar expressions suggesting future outcomes or events. Forward-

looking statements regarding earnings, possible mortgage losses, and mortgage portfolio growth are based upon assumptions regarding performance of the economy in general and real estate markets in particular. Forward-looking statements generally assume that our revenues and expenses continue to follow current trends, and that current trends in our mortgage portfolio growth continue.

All forward-looking statements reflect management's current beliefs and are based on information currently available to management. These statements are not guarantees of future performance and are based on our estimates and assumptions that are subject to risks and uncertainties which could cause our actual results to differ materially from the forward-looking statements contained in this MD&A or elsewhere. Those risks and uncertainties include risks associated with mortgage lending, competition for mortgage lending, real estate values, interest rate fluctuations, environmental matters and the general economic environment. For other risks and uncertainties, please refer to "Risks and uncertainties" above, and the "Risk Factors" section of our Annual Information Form for the year ended December 31, 2017 which is available at www.sedar.com and at www.atriummic.com. That list is not exhaustive, as other factors could adversely affect our results, performance or achievements. The reader is cautioned against undue reliance on any forward-looking statements.

Although the forward-looking information contained in this MD&A is based upon what management believes are reasonable assumptions, there can be no assurance that actual results will be consistent with these forward-looking statements. We will not publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, unless required to do so by law.

Responsibility of management and the board of directors

Management is responsible for the information disclosed in this MD&A, and has in place the appropriate information systems, procedures and controls to ensure that the information used internally by management and disclosed externally is materially complete and reliable. In addition, our audit committee and board of directors provide an oversight role with respect to our public financial disclosures, and have reviewed and approved this MD&A and the annual financial statements.

Dividend Reinvestment Plan

A Dividend Reinvestment Plan (DRIP) is available to holders of our common shares. The DRIP allows participants to have their monthly cash dividends reinvested in additional common shares, at a discount of 2% from the market price. Shareholders who wish to enroll or who would like further information about the DRIP should contact their broker or our agent for the DRIP, Computershare Trust Company of Canada, at 1 (800) 564-6253 or www.computershare.com.

Additional information

Additional information about Atrium, including our Annual Information Form for the year ended December 31, 2017, is available on SEDAR at www.sedar.com. You may also obtain further information about us from our website at www.atriummic.com, by telephone at (416) 607-4200, or by email at info@atriummic.com.

Interim Consolidated Financial Statements

First Quarter
March 31, 2018

CANADA'S PREMIER NON-BANK LENDER™

INTERIM CONSOLIDATED STATEMENTS OF FINANCIAL POSITION
(UNAUDITED)
(in thousands of Canadian dollars)

	<u>Notes</u>	<u>March 31</u> <u>2018</u>	<u>December 31</u> <u>2017</u>
Assets

NOTE 1 – NATURE OF OPERATIONS

Atrium Mortgage Investment Corporation is a corporation domiciled in Canada, incorporated under the Ontario *Business Corporations Act*. The address of the company's registered head office and principal place of business is Suite 900, 20 Adelaide Street East, Toronto, Ontario M5C 2T6.

The company is a Mortgage Investment Corporation (MIC) as defined in Section 130.1(6) of the Canada *Income Tax Act* (ITA). Accordingly, the company is not taxed on income provided that its taxable income is paid to its shareholders in the form of dividends within 90 days after December 31 each year. Such dividends are generally treated by shareholders as interest income, so that each shareholder is in the same position as if the mortgage investments made by the company had been made directly by the shareholder.

The company's common shares are listed on the Toronto Stock Exchange (TSX) under the symbol AI and its convertible debentures are listed under the symbols AI.DB, AI.DB.A, AI.DB.B and AI.DB.C.

NOTE 2 – BASIS OF PRESENTATION**(a) Statement of compliance**

These interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and follow International Accounting Standard 34 *Interim Financial Reporting* (IAS 34) as issued by the International Accounting Standards Board (IASB) as set out in Part I of the *CPA Canada Handbook – Accounting*. These interim consolidated financial statements should be read in conjunction with the company's audited financial statements for the year ended December 31, 2017. Except as indicated in Note 2(b), significant accounting policies have been consistently applied in the preparation of these interim consolidated financial statements. These statements were authorized for issuance by the board of directors on April 25, 2018.

(b) Change in accounting policy

Effective January 1, 2018, the company adopted IFRS 9 *Financial Instruments* (IFRS 9), which replaced IAS 39 *Financial Instruments: Recognition and Measurement*. IFRS 9 addresses classification and measurement of financial assets and liabilities, as well as impairment of financial assets. As a result of the application of IFRS 9, the company changed its accounting policies for financial assets and mortgages receivable effective January 1, 2018. As permitted by the transition provisions of IFRS 9, prior periods have not been restated. The company's financial assets continue to be measured at amortized cost, therefore, no reclassifications were required. Measurement differences in the carrying amounts on January 1, 2018 have been recognized through an adjustment to retained earnings on that date. See Notes 3(b), 3(d) and 5(b).

Financial liabilities continue to be recognized initially at fair value net of transaction costs, and are subsequently measured at amortized cost (see Note 3(g)).

(c) Basis of measurement

These interim consolidated financial statements are prepared on the historical cost basis.

(d) Functional and presentation currency

These interim consolidated financial statements are presented in Canadian dollars, which is also the company's functional currency. Dollars are expressed in thousands except for per share amounts or where the context requires otherwise.

(e) Principles of consolidation

These interim consolidated financial statements include the accounts of the company and CMCC Sisyphus LP, which is considered to be a subsidiary for accounting purposes. Consolidation commenced the date the company obtained control and continues until control ceases. Atrium has consolidated the subsidiary from August 5, 2016, the date of its formation. All transactions and balances between the company and the subsidiary have been eliminated, including unrealized gains and losses, if any.

NOTE 2 – BASIS OF PRESENTATION (continued)**(f) Use of estimates and judgements**

The preparation of interim consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions and judgements that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the reporting date and the reported amounts of revenue and expenses during the reporting period. The most subjective of these estimates relates to: (a) valuation of mortgages receivable, which is affected primarily by the provision for mortgage losses, and (b) the measurement of the liability and equity components of the convertible debentures which depend upon the estimated market interest rates for a comparable debenture without the convertibility feature. Management believes that its estimates are appropriate; however, actual results could differ from the amounts estimated. Estimates and underlying assumptions are reviewed each quarter. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

NOTE 3 – SIGNIFICANT ACCOUNTING POLICIES**(a) Revenue recognition**

Mortgage interest and fees revenues are recognized in the statement of income and comprehensive income using the effective interest method. Mortgage interest and fees revenues include the company's share of any fees received, as well as the effect of any discount or premium on the mortgage. Interest revenue is calculated on the gross carrying amount for mortgages receivable in Stage 1 and 2 and on the net carrying amount for mortgages receivable in Stage 3.

The effective interest method derives the interest rate that discounts the estimated future cash receipts during the expected life of the mortgage receivable (or, where appropriate, a shorter period) to its carrying amount. When calculating the effective interest rate, future cash flows are estimated considering all contractual terms of the financial instrument, but not future credit losses (see Note 3 (d)). The calculation of the effective interest rate includes all fees and transaction costs paid or received. Fees and transaction costs include incremental revenues and costs that are directly attributable to the acquisition or issuance of the mortgage.

(b) Financial assets – classification, initial recognition and measurement

The company's business model and a financial instrument's contractual cash flows determine its classification and measurement in the financial statements. Upon initial recognition, each financial asset will be classified as either fair value through profit or loss (FVTPL), amortized cost, or fair value through other comprehensive income (FVOCI). All equity instruments are measured at fair value. A debt instrument is recorded at amortized cost only if the entity is holding the instrument to collect contractual cash flows and the cash flows represent solely principal and interest. Otherwise it is recorded at FVTPL.

All financial assets are reviewed for impairment quarterly, and written down when there is evidence of impairment. A financial asset is considered to be impaired when there is objective evidence that one or more events have occurred that have a negative effect on the estimated future cash flows of the financial asset (see Note 3(d)).

(c) Financial instruments – derecognition of financial assets and liabilities

Financial assets are derecognized when the contractual rights to receive cash flows from the asset expire. When the company exercises its security and takes title to the underlying real estate, a mortgage receivable is derecognized on the date of foreclosure. Financial liabilities are derecognized when the obligation under the liability is discharged, cancelled, or expires.

NOTE 3 – SIGNIFICANT ACCOUNTING POLICIES (continued)**(d) Mortgages receivable and provision for mortgage losses**

Mortgages receivable are a financial asset and are recognized initially at fair value and are subsequently carried at amortized cost using the effective interest method. The company's business model is to hold mortgages receivable to collect contractual cash flows that represent solely payments of principal and interest. Mortgages receivable are assessed for impairment at the end of each reporting period in accordance with IFRS 9 as outlined below and are presented net of provisions for mortgage losses on the interim consolidated statement of financial position.

IFRS 9 uses an expected credit loss (ECL) model to determine impairment. The impairment requirements in IFRS 9 apply to financial assets that are measured at amortized cost or FVOCI, and off-balance-sheet lending commitments such as loan commitments and letters of credit (which are collectively referred to in this note as financial assets). The ECL model is forward looking and results in a provision for mortgage losses being recorded on all financial assets regardless of whether there has been a loss event. ECLs are the difference between the present value of all contractual cash flows that are due under the original terms of the contract and the present value of all cash flows expected to be received.

The ECL model uses a three-stage impairment approach based on changes in the credit risk of the financial asset since initial recognition. The three stages are as follows: Stage 1 – financial assets that have not experienced a significant increase in credit risk since initial recognition, Stage 2 – financial assets that have experienced a significant increase in credit risk between initial recognition and the reporting date, and Stage 3 – financial assets for which there is objective evidence of impairment at the reporting date. The company considers a number of factors when assessing if there has been a significant increase in credit risk, including the number of days past due, changes in the financial condition of the borrower, responsiveness of the borrower and other borrower or property specific information that may be available. The company also considers past events, current market conditions and supportable forward-looking information, including macro-economic factors. Interest revenue is calculated on the gross carrying amount for financial assets in Stage 1 and 2 and on the net carrying amount for financial assets in Stage 3.

The ECL model requires the recognition of credit losses equal to 12-month ECLs for Stage 1 financial assets and ECLs for the remaining life of the financial assets (lifetime expected credit losses) for financial assets classified as Stage 2 and 3. The lifetime expected credit losses represent the expected loss in value due to possible default events over the life of a financial instrument weighted by the likelihood of a loss. Three factors are primarily used to measure ECLs: probability of default (PD), loss given default (LGD) and exposure at default (EAD). These factors are used to estimate the ECLs for mortgages receivable classified as Stage 1. When mortgages receivable are considered to have experienced a significant increase in credit risk (Stage 2) or are considered to be impaired (Stage 3), each loan is assessed and the ECL estimated individually for each mortgage. The company considers a loan to be in default if it is greater than 30 days past due (90 days for single-family residential mortgages).

(e) Foreclosed properties

Foreclosed properties are properties over which the company has taken title through exercise of its security interest. Such properties are accounted for under the cost model of IAS 40, Investment Property. A foreclosed property is initially recognized at cost on the date of foreclosure, which is the book value of the respective mortgage net of any related provision for mortgage loss. Any costs subsequently incurred to complete the construction or development of a foreclosed property are capitalized. Depreciation is recorded from the date the property is substantially complete. If the higher of the fair value and the value in use of a foreclosed property (its recoverable amount) is less than its carrying amount, then an impairment loss is recognized for the excess. Any impairment loss, or gain or loss realized on disposal is recognized in the statement of income and comprehensive income.

NOTE 3 – SIGNIFICANT ACCOUNTING POLICIES (continued)**(f) Convertible debentures**

Convertible debentures can be converted into common shares of the company at the option of the investor. They are compound financial instruments with two components: a financial liability, and a call option which is an equity instrument. The fair value of the liability component is measured as of the date that the debentures were issued, and the equity instrument is valued on that date based upon the difference between the fair value of the convertible debenture and the fair value of the liability component. The measurement of the fair value of the liability component is based upon market rates of interest on similar debt instruments without the conversion feature. Expenses of issue are allocated between the two components on a pro-rata basis. The book value of the debt is accreted up to its face value over the life of the debentures using the effective interest method, which applies a constant interest rate over the life of each debenture. The value of the equity component is not remeasured subsequent to its initial measurement date.

(g) Other financial liabilities

Other financial liabilities are non-derivative liabilities recognized initially at fair value, net of transaction costs, and are subsequently stated at amortized cost using the effective interest method. The company has classified borrowings under credit facility, accounts payable and accrued liabilities, dividends payable and the liability component of convertible debentures as other financial liabilities.

(h) Income taxes

The company qualifies as a Mortgage Investment Corporation under the ITA, and as such is not taxed on income provided that its taxable income is distributed to its shareholders in the form of dividends within 90 days after December 31 each year. It is the company's policy to pay such dividends to remain non-taxable. Accordingly, no provision for current or deferred income taxes is required.

(i) Earnings per common share

Basic earnings per common share is calculated by dividing earnings during the period by the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated by adjusting the income and comprehensive income attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all dilutive items such as convertible debentures and deferred share incentive plans.

(j) Share-based payments

The company has an equity-settled share-based compensation plan for grants to eligible directors, officers, and senior management under its deferred share incentive plan. Grants are measured based upon the fair value of the awards granted, using the volume-weighted average trading share price for the five trading days prior to date of the grant.

NOTE 4 – RECENT ACCOUNTING PRONOUNCEMENTS

Various pronouncements have been issued by the IASB or IFRS Interpretations Committee (IFRIC) that will be effective for future accounting periods. The company closely monitors new accounting standards as well as amendments to existing standards and assesses what impact, if any, they will have on the consolidated financial statements.

NOTE 5 – MORTGAGES RECEIVABLE**(a) Mortgage portfolio**

Mortgage category	March 31, 2018			December 31, 2017		
	Number	Outstanding amount	% of Portfolio	Number	Outstanding amount	% of Portfolio
Low-rise residential	38	\$ 250,335	38.3%	36	\$ 234,343	37.1%
House and apartment	114	100,953	15.4%	120	86,287	13.6%
Construction	8	69,788	10.6%	8	64,828	10.3%
Mid-rise residential	3	37,000	5.6%	4	31,471	5.0%
High-rise residential	5	20,501	3.1%	7	44,949	7.1%
Condominium corporation	14	2,800	0.4%	14	2,887	0.4%
Residential portfolio	182	481,377	73.4%	189	464,765	73.5%
Commercial	26	174,196	26.6%	27	167,622	26.5%
Mortgage portfolio	<u>208</u>	<u>655,573</u>	<u>100.0%</u>	<u>216</u>	<u>632,387</u>	<u>100.0%</u>
Accrued interest receivable		2,653			2,537	
Mortgage discount		(252)			(262)	
Unamortized origination fees		(625)			(706)	
Provision for mortgage losses		(9,500)			(7,200)	
Mortgages receivable		<u>\$ 647,849</u>			<u>\$ 626,756</u>	

The expected credit loss model uses a three-stage impairment approach that is based on changes in the credit quality of the mortgage receivable since initial recognition. At March 31, 2018, the gross carrying amounts of the mortgage portfolio were classified as follows: Stage 1 - \$629,391, Stage 2 - \$6,615 and Stage 3 - \$19,567.

The mortgage portfolio has maturity dates between 2018 and 2030 with a weighted average remaining term of 12.3 months at March 31, 2018 (December 31, 2017 – 12.4 months). The portfolio has a weighted average interest rate (which excludes lender fees earned by the company) of 8.50% as at March 31, 2018 (8.44% as at December 31, 2017, 8.46% as at March 31, 2017).

Within the mortgage portfolio, at March 31, 2018 there were 12 loans aggregating \$40,717 (6.2% of the mortgage portfolio) in which the company has a subordinate position in a syndicated mortgage (December 31, 2017 – 13 mortgages aggregating \$40,550, 6.4% of the portfolio). Additional analysis of the mortgage portfolio, including by location of underlying property and type of mortgage, is set out in the “Investment Portfolio” section of the Management’s Discussion and Analysis for the quarter ended March 31, 2018.

Principal repayments based on contractual maturity dates are as follows:

Nine months ended December 31, 2018	\$ 316,862	48.3%
Years ended December 31, 2019	214,651	32.7%
2020	93,797	14.3%
2021	23,295	3.6%
2022	320	0.1%
Thereafter	<u>6,648</u>	<u>1.0%</u>
	<u>\$ 655,573</u>	<u>100.0%</u>

NOTE 5 – MORTGAGES RECEIVABLE (continued)**(b) Provision for mortgage losses**

		IFRS 9 as at January 1, 2018 and March 31, 2018			
		<u>Stage 1</u>	<u>Stage 2</u>	<u>Stage 3</u>	<u>Total</u>
IAS 39 balance, December 31, 2017	\$ 7,200				
Transition adjustment (Note 2(b))	<u>2,000</u>				
IFRS 9 opening balance, January 1, 2018	<u>\$ 9,200</u>	\$ 3,300	\$ –	\$ 5,900	\$ 9,200
Provision for mortgage losses		<u>200</u>	<u>–</u>	<u>100</u>	<u>300</u>
Balance, March 31, 2018		<u>\$ 3,500</u>	<u>\$ –</u>	<u>\$ 6,000</u>	<u>\$ 9,500</u>
					Three months ended March 31 2017
Balance, beginning of period					<u>\$ 5,800</u>
Mortgages settled during the period					(203)
Provision for mortgage losses					<u>303</u>
Balance, end of period					<u>\$ 5,900</u>

The provision for mortgage losses for the period is the sum of the ECLs for all mortgages in the portfolio. Probability of default (PD), loss given default (LGD) and exposure at default (EAD) are used to estimate the ECLs from default events that are possible within the next 12 months for mortgages receivable classified as Stage 1. These variables are determined using historical data and current and future expected conditions are taken into consideration at each reporting period. When mortgages receivable are considered to have experienced a significant increase in credit risk (Stage 2) or are considered to be impaired (Stage 3), each loan is reviewed on an individual basis and the ECL estimated individually for each mortgage. Lifetime ECLs are estimated for mortgages with a significant increase in credit risk or that are considered to be impaired.

NOTE 6 – FORECLOSED PROPERTIES

In 2016, the company foreclosed on two properties which were the underlying security for mortgages receivable. The properties were recognized at cost of \$1,179 on the dates of foreclosure. During the year ended December 31, 2017 the company disposed of one foreclosed property with a book value of \$558 resulting in a net loss of \$19. The book value at March 31, 2018 and December 31, 2017 approximates fair value.

	Three months ended March 31 2018	Year ended December 31 2017
Balance, beginning of period	\$ 1,064	\$ 1,223
Capital improvements	2	399
Disposition of foreclosed property	–	(558)
Balance, end of period	<u>\$ 1,066</u>	<u>\$ 1,064</u>

NOTE 7 – CREDIT FACILITY

At March 31, 2018, the company had a credit facility from a syndicate of four Canadian financial institutions of \$210,000 (December 31, 2017 – \$210,000) at a formula rate that varies with bank prime and the market bankers' acceptance rate. The annualized weighted average rate for the period ended March 31, 2018 was 3.53% (3.12% for the year ended December 31, 2017). Drawings under the credit facility may be by way of a bank loan (including an overdraft facility of up to \$500), bankers' acceptances or letters of credit (LCs). LCs represent irrevocable assurances that the company's banks will make payments in the event that a customer cannot meet its obligations to third parties. LCs carry the same credit risk, recourse and collateral security requirements as mortgages extended to customers. The committed credit facility was effective November 28, 2017, has a term to January 11, 2020, and is subject to certain conditions of drawdown and other covenants.

NOTE 7 – CREDIT FACILITY (continued)

The credit facility is secured by a lien over all of the company's assets by means of a general security agreement. The amount that may be drawn down under the credit facility is determined by the aggregate value of mortgages that are acceptable to the lender. Under the terms of the credit facility, covenants must be met in respect of shareholders' equity, debt to total assets and interest coverage. At March 31, 2018 and December 31, 2017, the company was in compliance with these covenants.

	March 31	December 31
	2018	2017
Credit facility		
Bankers' acceptances	\$ 125,000	\$ 125,000
Bank loan	14,200	19,900
Overdraft facility	95	254
Unamortized finance costs	<u>(710)</u>	<u>(700)</u>
Borrowings under credit facility	138,585	144,454
Letters of credit	<u>3,523</u>	<u>3,640</u>
Total credit facility utilization	<u>\$ 142,108</u>	<u>\$ 148,094</u>

NOTE 8 – RELATED PARTY TRANSACTIONS

The company pays management and mortgage servicing fees to Canadian Mortgage Capital Corporation (CMCC), which is the manager of the company, and responsible for its day-to-day management. The majority beneficial owner and Chief Executive Officer (CEO) of the manager is also CEO of the company. The company incurred management and mortgage servicing fees of \$1,454 for the three months ended March 31, 2018 (three months ended March 31, 2017 – \$1,292). The management agreement between the company and CMCC contains provisions for the payment of termination fees to the manager in the event that the management agreement is terminated in certain circumstances. Amounts due to related party of \$511 (December 31, 2017 – \$1,021) are included in accounts payable and accrued liabilities and are due to CMCC, are in the normal course of business, are non-interest bearing, due on demand and are paid within 30 days of each period end.

Certain of our mortgages are shared with other investors. As at March 31, 2018, companies owned by a director and officer of the company had co-invested in one syndicated mortgage. The total amount of the mortgage is \$46,590 (December 31, 2017 – one syndicated mortgage of \$45,360) of which the company's share is \$23,295 (December 31, 2017 – \$22,680).

As at March 31, 2018, the company had two mortgages receivable which a director and officer of the company has joint control over the borrowers of these mortgages. (December 31, 2017 – two).

- A mortgage loan with a total gross commitment of \$3,490 (December 31, 2017 – \$3,490), of which \$3,148 (December 31, 2017 – \$3,071) had been funded at March 31, 2018. During the three months ended March 31, 2018, the company recognized net mortgage interest and fees of \$70 (three months ended March 31, 2017 – \$nil) from this mortgage receivable.
- A mortgage loan with a total gross commitment of \$8,738 (December 31, 2017 – \$8,738). The company's share of the commitment is \$2,330 (December 31, 2017 – \$2,330), of which \$2,330 had been funded at March 31, 2018 (December 31, 2017 – \$2,330). During the three months ended March 31, 2018, the company recognized net mortgage interest and fees of \$54 (three months ended March 31, 2017 – \$nil) from this mortgage receivable.

Key management includes directors and officers of the company. Compensation expenses for key management personnel include:

	Three months ended March 31	
	2018	2017
Directors' fees	\$ 45	\$ 45
Share-based payments to directors (Note 11)	34	37
Share-based payments to officers (Note 11)	<u>13</u>	<u>21</u>
	<u>\$ 92</u>	<u>\$ 103</u>

Related party transactions are in the normal course of business and are recorded at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

NOTE 10 – SHARE CAPITAL

The company is authorized to issue an unlimited number of common shares without par value. Common shares rank equally with each other and have no preference, conversion, exchange or redemption rights. Common shares participate pro rata with respect to any dividends paid, including distributions upon termination and dissolution. (See Note 15 – Subsequent events.)

The company has an optional dividend reinvestment plan (DRIP) for shareholders, whereby participants may reinvest cash dividends in additional common shares of the company at the volume weighted average price for five days prior to distribution, less a 2% discount. Shares issued under the DRIP are issued by the company from treasury.

Under the employee share purchase plan (ESPP), each participant may contribute up to an annual maximum to the ESPP, and CMCC (the manager) matches 50% of the participant's contribution. Thus, the company does not bear any of the cost of the ESPP, as it is reimbursed by CMCC and the participants.

NOTE 11 – SHARE-BASED PAYMENTS

	Three months ended			Year ended		
	March 31, 2018			December 31, 2017		
	Deferred share units	Income deferred share units	Total	Deferred share units	Income deferred share units	Total
Balance, beginning of period	81,667	11,502	93,169	68,917	8,448	77,365

Units earned	–	1,360	1,360	–	5,948	5,948
Common shares issued	<u>(11,000)</u>	<u>(2,131)</u>	<u>(13,131)</u>	<u>(11,250)</u>	<u>(2,894)</u>	<u>(14,144)</u>
Balance, end of period	<u>70,667</u>	<u>10,731</u>	<u>81,398</u>	<u>81,667</u>	<u>11,502</u>	<u>93,169</u>

Share compensation expense:

	Three months ended March 31	
	2018	2017
September 1, 2017 grant	\$ 41	\$ –
September 1, 2016 grant	24	50
September 1, 2015 grant	12	25
September 1, 2014 grant	4	11
August 30, 2013 grant	1	3
August 29, 2012 grant	–	1
	<u>\$ 82</u>	<u>\$ 90</u>

Grants are provided to directors and certain employees of the manager under the company's deferred share incentive plan ("DSIP"). The deferred share units vest annually over three years. Common shares are issued to participants on the vesting date of each tranche of deferred share units, unless a participant elects to defer the issuance. In addition, income deferred share units ("IDSU") are credited to holders of deferred share units granted before 2017 based upon dividends paid on common shares. The fair value of share-based compensation was based upon the volume weighted average market price of the common shares five days prior to the grant date of September 1, 2017 (\$12.26).

NOTE 12 – EARNINGS PER SHARE

Diluted earnings per share	<u>\$ 0.24</u>	<u>\$ 0.24</u>

NOTE 13 – FINANCIAL INSTRUMENTS**(a) Classification of financial instruments**

Financial assets comprise mortgages receivable and are classified and measured at amortized cost. Financial liabilities comprise borrowings under credit facility, accounts payable and accrued liabilities, dividends payable and the liability component of convertible debentures. All financial liabilities are classified as other financial liabilities.

(b) Fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between arm's length market participants at the measurement date. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data or other means.
- Level 3 inputs are unobservable (supported by little or no market activity).

The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs. All financial assets are classified and measured at amortized cost. Their carrying values approximate their fair value due to their relatively short-term maturities and because market interest rates have not fluctuated significantly since the date at which the loans were entered into. The fair value of borrowings under credit facility approximates book value since it bears interest at floating rates. The accounts payable and accrued liabilities and dividends payable carrying value approximates their fair value due to the short term nature of the items.

The fair value of convertible debentures at the time of issue is established using Level 2 inputs. The fair value of convertible debentures has been determined based on the closing prices of the convertible debentures on the TSX on the respective dates.

	March 31	December 31
	2018	2017
Convertible debentures		
Fair value	\$ 131,097	\$ 131,134
Less book value of equity component	(1,322)	(1,322)
	<u>\$ 129,775</u>	<u>\$ 129,812</u>
Book value of financial liability component	<u>\$ 126,270</u>	<u>\$ 125,976</u>

NOTE 13 – FINANCIAL INSTRUMENTS (continued)**(c) Credit risk**

Mortgages receivable and issued letters of credit are exposed to credit risk. Credit risk is the risk that a counterparty to a financial instrument will fail to discharge its obligation or commitment, resulting in a financial loss to the company.

The company mitigates the credit risk by maintaining strict credit policies including due diligence processes, credit limits, documentation requirements, review and approval of new mortgages by the board of directors or a subgroup thereof, quarterly review of the entire portfolio by the board of directors, and other credit policies approved by the board of directors. Credit risk is approved by the board of directors. At March 31, 2018, the largest borrower group accounted for 10.4% of mortgages receivable (December 31, 2017 – 9.0%). See Note 5(a) for a breakdown of mortgages by category.

(d) Liquidity risk

Liquidity risk is the risk that the company will not be able to meet its obligations when due. The primary sources of liquidity risk are the requirements to fund commitments for new mortgages, advances on existing mortgages, as well as obligations under the company's credit facility. The company's liquidity risk is managed on an ongoing basis in accordance with the policies and procedures in place that reduce the risk to an acceptable level. Policies and procedures include continual monitoring of expected cash flows, reviewing credit requirements with the company's bankers, issuing convertible debentures or common shares in the public markets from time to time as required, and staggering the maturities of convertible debentures when they are issued. From time to time the company has arranged temporary increases in its credit facility with its banks in order to manage liquidity requirements, and expects to be able to continue to do so in the future if required. The company's significant financial liabilities include borrowings under credit facility, accounts payable and accrued liabilities, dividends payable and the liability component of convertible debentures. The borrowings under credit facility are drawn upon as required to discharge accounts payable and accrued liabilities as well as to pay out dividends on a monthly basis. The company's agreement with the lender is that the operating line will not be called provided that all covenants are met and that any significant excess cash is used to pay down the borrowings under credit facility.

March 31, 2018	Carrying value	Contractual cash flow	Within 1 year	1 to 3 years	3 to 5 years
Borrowings under credit facility ¹	\$139,295	\$148,428	\$5,130	\$143,298	\$ –
Accounts payable and accrued liabilities	1,537	1,537	1,537	–	–
Dividends payable	2,682	2,682	2,682	–	–
Convertible debentures ²	126,270	139,263	68,248	44,039	26,976
Total	269,784	291,910	77,597	187,337	26,976
Unadvanced mortgage commitments ³	–	78,587	78,587	–	–
Total contractual liabilities	\$269,784	\$370,497	\$156,184	\$187,337	\$ 26,976

Notes:

(1) Includes interest assuming the outstanding balance is not repaid until maturity on January 11, 2020.

(2) The 5.25% debentures are assumed to be repaid June 30, 2018; 6.25% debentures are assumed to be repaid April 1, 2018; 5.50% debentures are assumed to be repaid September 30, 2019 and 5.3% debentures are assumed to be repaid June 30, 2022.

(3) Unadvanced mortgage commitments include additional funds on existing mortgage and new mortgage commitments. The experience of the company has been that a portion of the unadvanced amounts on existing mortgages will never be drawn.

As at March 31, 2018, management considers that it has adequate procedures in place to manage liquidity risk.

NOTE 13 – FINANCIAL INSTRUMENTS (continued)**(e) Interest rate risk**

The company is exposed to interest rate risk in that an increase in interest rates will result in increased interest expense due to its borrowings under credit facility being set at a variable rate but all mortgages being set at fixed rates. The financial structure of the company results in relatively moderate interest rate risk because a majority of the company's financing is through common shares and convertible debentures, with a moderate amount of borrowings under the credit facility that bear floating interest rates.

If interest rates on debt had been one percentage point higher (lower) during the period ended March 31, 2018, income and comprehensive income would have been reduced (increased) by approximately \$1,415 during the period, assuming that no changes had been made to the interest rates at which new mortgage loans were entered into. However, if new mortgage loans had been entered into at higher (lower) interest rates, the resulting reduction of income and comprehensive income would have been less than (greater than) \$1,415.

(f) Currency risk

Currency risk is the risk that the value of financial assets and liabilities will fluctuate due to changes in foreign exchange rates. The company is not exposed to currency risk as all assets and liabilities are denominated in Canadian funds.

NOTE 14 – CAPITAL MANAGEMENT

The company defines capital as total debt plus shareholders' equity, as shown below:

	March 31	December 31
	2018	2017
Borrowings under credit facility	\$ 138,585	\$ 144,454
Convertible debentures	<u>126,270</u>	<u>125,976</u>
Total debt	264,855	270,430
Shareholders' equity	<u>377,084</u>	<u>349,064</u>
Capital employed	<u>\$ 641,939</u>	<u>\$ 619,494</u>

The company's objectives for managing capital are to preserve shareholders' equity, provide shareholders with stable dividends, and to use leverage in a conservative manner to improve return to shareholders. The company finances growth of its portfolio by issuing common shares and debt. In addition, a small amount of equity is raised every month through a dividend reinvestment plan for shareholders and the employee share purchase plan.

As bank borrowings increase, the company could expect to raise further funds through public offerings of convertible debentures or common shares, and through private placements of debt. The borrowings under credit facility are subject to external covenants as set out in Note 7. There has been no change in the company's capital management objectives since the prior period.

NOTE 15 – SUBSEQUENT EVENTS

On April 12, 2018, the company issued 25,222 common shares (\$306) to shareholders under its dividend reinvestment plan.

On April 9, 2018, the company issued 360,000 common shares (\$4,500) to shareholders under the over-allotment option of the public offering of common shares completed March 28, 2018. This issuance represented full exercise of the over-allotment option.
